PROFESSIONAL SUMMARY

Software Engineer who builds, ships and owns production **Python APIs**, **React** frontends and **CI/CD** on AWS, from code to deployment, monitoring and root cause analysis. Builds AI agents and RAG systems: **browser-harness**, a stateful multi-node LangGraph agent with LLM tool calling over an MCP server, and **rag-engine**, a RAG app over PDFs on FastAPI, LangChain and Ollama.

WORK EXPERIENCE

Infuse, useMango

Aug 2023 - Present

Software Engineer

Goa, India

- Developed and maintained Python APIs, reducing response latency by **25%** and improving integration reliability.
- Built and automated CI/CD pipelines, cutting deployment time by **50%** and increasing release consistency.
- Wrote infrastructure-as-code (IaC) in AWS CloudFormation and AWS CDK for these pipelines and automated the deployment of microservices.
- Performed troubleshooting and root cause analysis (RCA), resolving **97%** of production issues within SLA.
- Implemented Redis-backed rate limiting and authentication, throttling API requests and handling token/session validation.
- Implemented Pact contract testing and integrated it into AWS CI/CD pipelines for reliable service compatibility.
- Improved React frontend performance, reducing load time by **30%** and enhancing overall user experience.

BloomBit

May 2022 - May 2023

Full Stack Intern

Goa, India

- Designed and integrated backend APIs using Node.js to support booking operations and admin controls.
- Implemented core user features like cruise selection, booking flow, pre-booking, discount application, and secure payment gateway integration.

PROJECTS

browser-harness: AI Browser Automation & Manual-Test Agent

Multi-node LangGraph agent (planner, executor, verifier) that turns plain-English manual test cases into executed browser flows, with capped retries and replans; tools served by browser_ops, a FastMCP server wrapping Selenium WebDriver.

Python, LangGraph, FastMCP, Selenium

rag-engine: RAG PDF Question-Answering App

RAG application that ingests PDF files into a ChromaDB vector store and answers questions with a Llama 3.2 model over the retrieved context, with a model-agnostic embedding layer (currently nomic-embed-text) and input sanitization to defend against prompt injection.

React, FastAPI, LangChain, Ollama, ChromaDB

SKILLS

Languages: Python, TypeScript, JavaScript

Backend & Data: FastAPI, Node, Express, Microservices, API Integration, MySQL, MongoDB, Redis, ChromaDB

Cloud & DevOps: AWS (Lambda, SQS, SNS, S3, API Gateway, EventBridge, CloudWatch, IAM), CloudFormation, AWS CDK, Docker, Git, GitHub Actions, Jenkins

Frontend, AI & Security: React, Next.js; LangGraph, LangChain, MCP, Ollama, RAG, LLM Tool-Calling; OAuth, JWT, RBAC; Unit, API and Contract Testing

EDUCATION

Bachelor of Engineering (Information Technology) Goa College of Engineering 2019 - 2023
